The Black Widow in the Gamer LAN!

Spin your own web quickly, simply and securely with the Mystify Black Widow – TerraTec's ultra-compact 5-port mini-switch for the gamer LAN. Five 10/100 Mbps auto-detection ports are sensitive to any data travelling through the network and link the systems of your fellow players automatically, and with consistently correct speed, in half or full duplex mode. With a cross-over cable, you can also use the uplink port as a fifth port – this makes the Mystify Black Widow equally suitable for use on your games network, or in a cascaded connection to another LAN.

Unlike in the wilderness, with the Mystify Black Widow your opponents won't get caught in the silken web: The Mystify Black Widow's "Store and Forward" architecture filters and eliminates error packets, ensuring optimum performance on all lines.

Typical TerraTec: The practical solutions provided by the Mystify Black Widow are quite visible, even in their details. Depending on your needs, the power supply can be provided either by the power adapter or the USB cable provided. With its magnetic feet, the metal housing, which is as robust as it is trendy, clings securely to most computer housings.

Last but not least: our request to BlackWidow users of the female persuasion: Please do not kill and consume your male opponents – even if you beat them in a death match. Thanks. ;-)

MYSTIFY YOUR GAMES

Want to squeeze every last drop of performance from your hardware? Push the possibilities of your games to the limit? Then pay attention to this label: "Mystify Your Games". Experience perfectly tuned professional equipment, specially developed for the needs of demanding players.

TERRATEC®

Technical Details

- Complies with IEEE 802.3 10Base-T and IEEE 802.3u 100Base-TX standards

- "Store and Forward" architecture filters

- 10/100Mbps auto-detection per port on full or half duplex

- IEEE 802.3x or back pressure (HDX) flow control

- 1K MAC address with automatic learning and 5-minute aging

- Five 10/100Mbps auto-detection ports, uplink port can be used as the 5th port with cross-over cable

- Power supply: +6 Vdc/500 mA (Please do not use any other power adapter besides the one provided)

- Automatic power saving with on-board maximum 1.55 W

- 5 x RJ45 STP/UTP network ports on rear panel

- Maximum 100m per port hub-to-hub or node-to-hub cable length

- Dimensions W x D x H: 82 x 66 x 20 mm

Article No.: 7330   EAN Code: 4017273673301   Warranty: 24 months
