

TERRACAM X1

The Webcam for all Situations

Transmit live images to the Internet or use it as a camera for videoconferences—just connect it via USB to your computer or laptop, and the TerraCam X1 provides sharp images at a resolution of 640 x 480 pixels in video mode. Using the snapshot button, you can even capture images at up to 1280 x 1024 pixels (interpolated) or small videos. With the TerraCam X1, you have the key equipment for the latest messenger applications. When you use it along with an optional headset, you are fully equipped for videoconferences or Internet telephony with image support. The holder, which can be locked in place, keeps the camera stable and ensures shake-free images.
