

# AirBeats HD

## Make your music system wireless

Wirelessly stream audio in HD to your existing music system via  
AirPlay or DLNA

Do you own a smartphone or tablet that you use often to listen to music or watch videos on and also already a high quality music system, but you have no possibility to connect your device to your existing system to display the audio in the highest possible quality? OEO AirBeats HD is **the** wireless product to solve this problem.

Connect the AirBeats HD to a free analogue or digital S/PDIF input on your music system and connect your smartphone, tablet or PC wirelessly with AirBeats HD. You can connect your device directly via WiFi to AirBeats HD or integrate AirBeats HD in your existing wireless network.

AirBeats HD is very easy to use with your smartphone and tablet. Your smart device will operate as a remote control so you can listen to your streaming audio service like Spotify, Deezer, Simfy, etc., internet radio application or own music files on your existing music system. AirBeats HD is fully compatible with Apple AirPlay. On Android devices you can use the free UPnP and DLNA App that is bundled with AirBeats HD.
