

DESCRIPTION

SINE MLM 62

6 Channel Stereo Mixer

Does your keyboarder need a preliminary mix of his synthesizers on stage? Would you like to add 2 MIC input channels to your mix? Does your guitarist want to get a handle on his effects devices? And do you want to solve all of these problems with a device that takes up as little space as possible? TerraTec's rack mixer SINE MLM 62 is just the perfect solution.

The unit has two outputs, a master volume control, one volume control per channel and balance controls for the stereo inputs. An effects loop with stereo return for all input channels is included as well — with a control knob for each channel, of course. The balanced microphone channels have a top quality 2-band EQ for bass and treble plus an input gain control on the units back side. With a signal-to-noise ratio of > 97 dB and a frequency response of 4Hz - 20KHz, noise isn't an issue and signals pass through the mixer without losses.

The MLM 62 is especially for solo acts and PA, club & restaurant situations, where there is little space to mix your equipment. Compact design, excellent technology and outstanding audio properties — and all for the price that you would ordinarily pay for a large package of high-quality cables.

- 2 mic/line in + 4 line in channels
- 2 output channels (stereo/mono)
- 1 effect send + 2 eff. returns (stereo)
- Input level -14 dB
- Output impedance 600 Ohm
- Signal-to-noise ratio > 97 dB
- Input impedance 22 kOhm
- Amplification up to 28 dB
- Frequency response 4 Hz - 20 kHz
- Power supply 12VAC -500mA
- Dimensions 482.6 x 87 x 44 mm
