CINERGY 800i PVR

Never miss a program again

With the Cinergy 800i PVR, your computer becomes a powerful and versatile video recorder for analog television. The video compression required takes place directly in the device, so no additional load is placed on your computer.

Installing the Cinergy 800i PVR is simple. Insert the card in a free PCI slot in your computer, connect it to your TV outlet (cable or antenna), install the software—and you're ready to receive analog TV with outstanding picture quality and full stereo sound.

The Cinergy 800i PVR places a special focus on digital video recorder functions. The recordings are compressed directly on the TV card (MPEG 2) and stored on the hard drive in DVD quality, saving valuable system resources. This is essential to trouble-free recording, especially on older systems.

Everything is as easy as child's play to operate. Either start recording by pressing a button while the program is running or program it to record while you are away. You can then edit the finished file in the software provided and remove blocks of commercials and other interruptions. Then burn the finished results to DVD.

Don't forget the many other advantages provided by watching TV on your computer: time-shifting TV programs, teletext, editing out commercials and other features will change your life.

The Cinergy 800i PVR is perfect for use in a home-entertainment system running Windows Media Center Edition (MCE). Thanks to its dedicated drivers, all functions are available with Windows MCE compliance.

CINERGY 800i PVR

Technical Details

Features
- Analogue TV for PC
- Recording with hardware MPEG2 encoder
- Scheduled recordings and time shifting
- Teletext
- Windows MCE compatible
- Infrared remote control
- Analogue video input via hardware MPEG2 encoder: S-Video, Composite
- Stereo audio input
- Full version media software for cutting and burning

Infrared remote control
- 48 buttons
- 2 x AAA batteries

Software
- ArcSoft TotalMedia2

System Requirements
- 1,5 GHz Intel or AMD CPU or comparable Centrino certified Notebook
- 512 MB RAM
- Windows XP, Windows XP MCE
- PCI 2.1 interface
- 150 MB free disc space for software installation
- Audio hardware with DirectX support
- DirectX9.0 compatible graphics board and video overlay support
- CD/DVD drive for driver and software installation
- CD/DVD drive for creating CDs/DVDs
- Analogue TV reception (antenna or cable)

Package Contents
- TerraTec Cinergy 800i PVR PCI card
- Infrared remote control incl. Batteries
- Installation/software CD-ROM
- Manual on CD-ROM
- Service card
- Registration card
- Quick Setup Guide

Article No.:	10341
EAN-Code:	4017273103419
