

CINERGY S2 PCI HD CI

The Pay-TV bundle: Cinergy S2 PCI HD incl. Common Interface module

- DVB-S & DVB-S2 PCI TV and radio tuner
- HD support for MPEG2 and H.264
- AC3 Dolby Digital
- Expandable for Pay TV reception (Cinergy CI AddOn)
- Digital video recorder
- Remote control

High-definition satellite TV

Experience the unbelievable picture and audio quality of HDTV—now on your computer! The Cinergy S2 PCI HD supports the new DVB-S2 standard and receives High Definition TV (HDTV) in fully broadcasted resolution via satellite. Naturally, earlier DVB-S formats are still supported so that you don't have to do without any of your favourite broadcasters or digital radio programmes.

Digital video recorder

Record HDTV programmes in full high-definition resolution and in H.264 format with the push of a button or via timer. With integrated MPEG 2/4 codec, you can also record previous formats in exceptional quality. You have the choice between manual and timed recording. The computer boots up from standby or sleep mode precisely when the chosen television show begins and then saves it on your hard drive automatically. No matter how you plan your recordings, they can be viewed immediately, even while the recording is in progress. And when you are finished, you can burn your recordings directly to CD or DVD!

Ready for pay TV

The Pay TV extension for Cinergy S2 PCI HD (satellite), installation into an available PCI slot. Common Interface for CAM plus smart card and pay TV contract necessary (not included).
