### **TerraTec Driver Installation Under Windows Vista**

#### Please note:

The screenshots might vary depending on your Windows Settings, appaerence option. Be certain your TerraTec device is connected to the PC for the installation. Also check the system requierments on the product box or in the user's manual.

# It is necessary that you perform the installation with the latest Windows XP / Vista drivers available on our website http://www.terratec.com.

#### How to download the latest drivers is described under "Part3"

If you want to know how to uninstall the drivers, got to "Part2"

All registered trademarks, product designations or brand names used in this document are the registered property of their respective owners. TerraTec Electronic GmbH, 1994 - 2008.

#### **Open the Device Manager:**

To open the Device Manager, go to <u>Start,</u> <u>Settings</u>, <u>Control Panel</u>, and select <u>"System</u> <u>and Maintenance</u>".

In the next window, please click on <u>"Device</u> <u>Manager</u> under Tasks on the left-hand side.

If Windows asks your permission to continue, select <u>"Continue</u>" to procede!

Alternativ: press keys WIN + Pause to open the Device Manager.

#### The Device Manager is opened:

N.B.: Your TerraTec product must previously be connected to the PC. USB based TV Cards might not work if you are using an external USB hub. If your TerraTec product is not recognized, you can simply try to connect it to a different USB port. For PCI based products, shut down your PC if you change PCI ports.

Make a right mouse click to open the properties of the TerraTec device which needs (new) drivers. Go to the tab <u>"Drivers</u>" and click <u>"Update Driver...</u>"

Terratec devices can generally be found under:

- Other Devices (Multimedia Controller)
- Sound, Video and Game Controller
- Digital Video

Any exclamation or question mark means that no drivers are installed for the device.

# Part 2: How To Uninstall a Driver

Open the Device Manager as explained in Part 1.

Right mouse clic the device you wish to uninstall and select <u>Uninstall</u> in the Context Menu.

Mark the checkbox and press  $\underline{OK}$  the uninstall the drivers.

Furthermore: after you have remove the entrie(s) in the Device Manager, you might need to erase some files created by Windows.

Make a search for <u>\*.inf</u> files including the text <u>terratec</u> and delete the ones which are located in the C:\Windows\ inf folder. In Windows Vista and XP, these files are named <u>oemx.inf</u>.

Note: Be sure all files and folder are visible (Under Windows XP Tools > Folder Options > View > "Show hidden files and folders") otherwise Windows will not find any files according to your search parameters.
