# WDM driver Installation Guide

NB: The following guide is using the fact that you are using Windows XP (An actual version of Direct X must be installed – available on installation CD or by Microsoft.)

#### Section A:

Remove All INF files related to your TerraTec product - to do this: -Go to My computer > Tools > Folder Options > View > tick Show hidden files and folders > press OK.

-My Computer > local disk C:\ >open the Windows folder > (show files if prompted) > open the **Inf** folder > search manually files named **OEM**x.inf. Double click these files and delete the one(s) relating to TerraTec.

Now unpack in the default location the drivers you have downloaded by double clicking the TerraTec icon.

### Section B:

-Remove the TerraTec Control Panel (software) and drivers from your system - To do this: select Start > Settings > Control Panel > Add/remove programs.

-You should be able to locate the TerraTec Control Panel (software) in here and you will need to uninstall it.

Go to Start > Settings > Control Panel > System > Hardware > Device Manager and click on the plus (+) next to sound and audio devices, here the TerraTec card should be listed, press the right mouse button and select Uninstall/ Remove. Now you will need to reboot your PC

## Section C:

The system will now detect a new PCI Multimedia Device found: - Click Next and Select Install from a specific location (Advanced) then click Next

- ONLY tick **Include this location in the search** and click **Browse**, go to C:\Terratec\_Driver and click OK.

#### Click Next

Click **Next** after you verified the path. (verify the driver signing is set at WARN and not REFUSE)

## Click Finish

Once you have achieved this, you are ready to install the Control Panel (software). Double click the grey icon for the WDM application. You can control in the Device Manager if the driver version is the correct one. This can also be done in the TerraTec software.

If windows does not automatically detect the PCI Multimedia Device on booting - please try the Multimedia card in a another PCI slot.
