

The professional DV editing solution for your PC!

Cameo DV 800 and the full version of VideoStudio 8 are the perfect team for comfortably editing your digital videos. Import DV movies via FireWire™ to your PC. Let your creativity direct the show – easy usability and many clever functions support you in making your final cuts effortlessly. Now you can transfer your movies to digital video devices or directly burn them to DVD or Video-CD. All these steps can be realised in realtime – this means less waiting and more time for creating!

1 Capture

Import your digital videos to your PC in realtime – the three FireWire™ interfaces also allow to connect up to 62 further FireWire™ devices like hard disks, scanners, mobile data carriers etc. In addition, Cameo DV 800 offers a total of four USB 2.0 interfaces for connecting digital photo cameras, printers and further USB 1.1/2.0 periphery.

2 Create

VideoStudio 8 provides you with a great deal of options to edit your imported videos and jazz them up with a wide-ranging palette of effects – no more boundaries for your creativity! Spice up your movies with video-in-video effects, animated titles, audio tracks and live comments. In face of the wide functional range your work will be easy, efficient, smooth and always in realtime.

3 Share

According to requirements you can transfer your finalised movies to mobile data carriers via FireWire™ or USB 2.0. Of course you can also directly create DVDs and Video-CDs with your own titles, menus and buttons. Even mobiles/PDAs with video function and web-based video albums are supported – present your movies whenever and wherever you want!

Complete right from the start!

Cameo DV 800's scope of delivery includes everything you'll need for a direct and successful start into the world of video editing: A fitting FireWire™ cable as well as a quick start guide and a detailed printed manual with more than 200 pages. In most cases there's no need to buy any further accessories!
