Preface

Thank you for choosing a TerraTec product. Congratulations on your decision to buy this sophisticated piece of state-of-the-art technology, the Grabster AV 150 MX. With it, you have purchased one of the most powerful products available for video applications. We are convinced that the Grabster AV 150 MX will be very useful and a lot of fun for you for a long time to come.

Grabster AV 150 MX and Magix Movies on CD & DVD TerraTec Edition are the perfect team for burning VCDs, SVCDs and DVDs with just a few clicks of the mouse. Copy your videos via USB onto your laptop or computer. Use video and slide show editing functions as well as the fully customizable selection menus to burn your valuable movie memories forever to CD and DVD at top quality. Also, it's quick and easy.

Copy

No matter what device or medium you want to import data from—from video recorders to satellite receivers, camcorders, and even DVD players—all devices with analog video outputs can be connected with a composite or S-video cable.

Edit

Edit out the commercials or other unwanted parts from your recordings. Add slide shows and videos. Pep up your creation with a wide range of transition effects and set the right mood by adding music and live commentary. Finally, select a menu template or create an individualized animated menu. Then your CD or DVD can be burned.

Playback

In no time at all, you have produced a professional DVD that is well worth watching—whether on your laptop or on your television. Surprise your friends with a DVD you created yourself! With just one click, you can make as many copies as you like and, as the perfect finishing touch, embellish your CD/DVD with labels using the integrated label program.

Product description

Product illustration

- 1** Composite video input
This input is used to connect external devices like video recorders and satellite receivers. We recommend using this input if your device features an S-video output. This input handles video signals only, no audio.
- 2** S video input
This input is used to connect analog video sources such as video recorders and satellite receivers. We recommend using this input if your device features an S-video output. This input handles video signals only, no audio.
- 3** Stereo audio input
If you are connecting analog video sources using the Composite or S-video input terminal, you also have to establish an audio connection. Use this input to do so.

Using the Grabster AV 150 MX for the first time

The Grabster is extremely simple to set up. The installation can be completed without shutting down your computer. Connect the USB cable to the Grabster AV 150 MX. Insert the included installation DVD in your DVD drive. Connect the Grabster AV 150 MX to a free USB 2.0 port on your computer with the USB cable. Your computer will recognize the new hardware and launch the installation wizard.

Installing drivers under Windows XP

1. When connecting the Grabster AV 150 MX for the first time, Windows XP will recognize it and will launch the hardware installation wizard. Next, select “Install the software automatically [Recommended]” and click “Next”.
2. Windows XP will automatically find the correct driver on the installation DVD.
3. Conclude the installation by clicking “Finish”.

This completes the installation of the drivers and you can now start installing the MAGIX software.

Installing drivers under Windows Vista

1. When connecting the Grabster AV 150 MX for the first time, Windows Vista will recognize it and will launch the hardware installation wizard. Click “Locate and install drivers software (recommended)”, followed by “Next”.
2. Windows Vista will automatically find the correct driver on the installation DVD. Windows will now ask whether you really want to install the driver software. Click “Install” to start the installation.
3. Conclude the installation by clicking “Close”.

This completes the installation of the drivers and you can now start installing the MAGIX software.

Installing Magix Movies on CD & DVD application

To install the software, insert the DVD and wait for the autostarter to launch. Select your language and the Software item. Click the MAGIX Software button to start the installation of Magix Movies on CD & DVD TerraTec Edition. Follow the instructions on the screen until the software is completely installed.

For a detailed manual and a brief video introduction to the software, use the online help after the installation is complete.

Service at TerraTec

“Nothing seems to work!” — This can happen even on the best systems. If this happens to you, the TerraTec team is happy to offer its service and support.

Hotline, Internet.

In case of a serious problem—where you can neither solve the problem on your own nor with the guided help found in this manual, nor with the help of your dealer—please contact us directly.

If you have access to the Internet, please check our service and support at <http://supporten.terratec.net/> first. There you'll find the answers to frequently asked questions (FAQ) and a form for e-mail support requests.

If you can't access our website, please check the service request form that came with the product for country-specific helpline numbers with which you can contact our support team.

Regardless of whether you contact us by e-mail or phone, you must have the following information at hand:

- your registration number,
- this documentation,
- information about your system.

In addition, it would be helpful to our technicians if the device is within reach during the phone call so that you can carry out our support tips directly. Please do not forget to write down the name of the respective support technician if you contact our Support Team. You will need this name if a defect is present and your device needs to be mailed to us.
